EXECUTIVE PROFILE

Technical and logistics leader with 25+ years of experience directing sustainment, modernization, configuration management, and acquisition support for complex defense systems in the United States, Europe, and the Middle East. Brings a proven record of leading multinational stakeholders, improving readiness, strengthening lifecycle support, and translating operational requirements into disciplined program execution.

CORE EXPERTISE

Lifecycle Sustainment	Program and Project Management	Configuration Management
Obsolescence Planning	Logistics Operations	Acquisition and Contracting
Technical Publications	SAP and Enterprise Systems	Quality Assurance
Property Accountability	Stakeholder Alignment	Multinational Coordination

PROFESSIONAL EXPERIENCE

Senior Technical Officer

Nov 2025-Present

NATO Support and Procurement Agency | Luxembourg

Develops and executes logistics support concepts for multinational customers and directs lifecycle services in a complex, high-demand environment. Provides strategic guidance on sustainment, budgeting, workload forecasting, acquisition, and industry performance while aligning technical, customer, and organizational priorities.

- Leads critical modernization initiatives through structured acquisition, configuration management, risk control, and performance-driven execution.
- Revitalized a delayed shelter-upgrade program within two months by aligning objectives and securing stakeholder commitment, restarting work after a two-year pause.

Technician

Sep 2023-Nov 2025

NATO Support and Procurement Agency | Luxembourg

Served as a technical and configuration-management interface for multinational customers. Analyzed engineering changes, maintained logistics and configuration data in SAP, managed technical publications, supported procurement, advised on obsolescence, and contributed to configuration audits and international working groups.

- Integrated tailored logistics support concepts for new and existing customer nations based on national sustainment needs and system configuration.
- Automated the evaluation and creation of configuration-change notices, eliminating a backlog of 261 engineering-change evaluations and associated records.
- Defined functional requirements and coordinated stakeholders for logistics-database upgrades, improving the user interface and tracking accuracy.
- Supported a radar-upgrade path by consolidating engineering changes and spare-parts requirements for a customer nation.
- Aligned operational logistics inputs with procurement planning, budgets, and service-delivery metrics.

PROFESSIONAL EXPERIENCE - CONTINUED

Logistics Supervisor

Feb-Sep 2021; Sep 2022-Mar 2023

ManTech Europe Systems Corporation | Germany

Led 35 logistics and technical professionals delivering SAP-enabled supply and maintenance support across 17 sites, three continents, six countries, and three U.S. states. Managed shop stock, work orders for a fleet of 3,000+ vehicles, government property, dangerous-goods compliance, and commercial-vendor operations.

- Restructured a 25-person logistics team into function-specific subject-matter groups, strengthening throughput and accountability while enabling distribution of 6,000+ repair parts to seven vendors.
- Introduced round-robin distribution and backhaul, increasing parts availability and recoverable-item returns by 75%.
- Relocated the team and \$8M in property and assets to a new site with no loss of productivity.
- Established a warehouse for \$3M+ in property and implemented government-property procedures for a 100+ person organization.
- Advised senior leaders on SAP change management and long-term sustainment strategy across Europe.

Planned career break for family caregiving: Oct 2021-Aug 2022.

Maintenance Program Manager / PATRIOT Technician

Feb 2017-May 2021

5-7 Air Defense Artillery Regiment, U.S. Army | Germany

Directed 21 multidisciplinary personnel delivering maintenance and logistics support to a 700-person organization across European operations. Managed readiness metrics, budgets, technical modernization, and leadership reporting for the only U.S. PATRIOT battalion in Europe.

- Completed PDB 7-to-PDB 8, radar-processor, operator-station, and communications upgrades one month early, under budget, and without discrepancies.
- Audited 3,200 line items across five maintenance nodes; removed 468 obsolete items and introduced 157 new parts, improving repair-cycle efficiency by 22% and reducing quarterly logistics delays by more than 30 hours.
- Sustained an operational readiness rate above the U.S. Army standard of 90% during international exercises.

Maintenance Project Manager / PATRIOT Technician

Jan 2012-Feb 2017

United States Army, Multiple Organizations | United States and overseas

Led 77 personnel managing maintenance for 4,000 items of equipment valued at more than \$1B. Directed repair operations, fault isolation, modifications, quality assurance, publications, maintenance administration, environmental-control programs, and hazardous-material compliance.

- Integrated support concepts with NATO partner forces during joint exercises, strengthening readiness and logistics interoperability.
- Planned the closure of 19 facilities and redeployment of \$724K in assets, contributing to \$112M in organizational cost savings.
- Led a post-deployment PATRIOT reset program and achieved scheduled-inspection compliance ahead of plan.

EDUCATION, TRAINING, AND RECOGNITION

Education

MBA, Project Management - in progress (18 of 33 credits)
B.A., Supply Chain Management
Concentration: Government Contracting and Acquisitions

Selected Training

PATRIOT Warrant Officer Advanced Course
Enhanced PATRIOT Launching Station
Operator/Maintainer Training

Recognition

Meritorious Service Medal
Army Commendation Medal (6)
Army Achievement Medal (3)
